CARL F. BUCHERER

LUCERNE 1888

CARL FRIEDRICH BUCHERER

Dear Friends, Ladies and Gentlemen,

— It all started more than 130 years ago when Carl Friedrich Bucherer's bold vision led him to Lucerne with his wife, Luise. In 1888, the couple opened their very first store in the city, selling watches and jewellery. Way ahead of their time, their sons, Ernst and Carl Eduard, continued the tradition, creating technological and artistic timepieces of their own. Combining the artistic skills of a jeweller and a watchmaker's crafting expertise is what defines the style of Carl F. Bucherer since then.

— In honor of our founder, the name Carl F. Bucherer was chosen to mark the beginning of a new era for the brand in 2001. His picture stands at the beginning of this book, paying tribute to him and marking the starting point of our story. His free spirit and creative expressionism still characterize our brand's essence. The baroque nature and incredible scenery of our unique birthplace, Lucerne, remains a constant source of inspiration to us. Today, our internationally operating company remains in the third generation of the family under Jörg G. Bucherer, owner and chairman of the board.

— To this day tradition, excellence, innovative strength and sustainability are more than just goals – we live by these values with exceptional timepieces and handcrafted movements, long-standing partnerships and enduring commitment. We set the highest standards for the quality of our work. Our timepieces stand testament to this, as all movements produced in-house invariably meet the requirements for COSC-certified precision. There is a reason the Fondation de la Haute Horlogerie (FHH) recognizes Carl F. Bucherer among its top manufacturers.

— Carl F. Bucherer has always been known for its pioneering spirit and innovational strength with no limits. This is superbly demonstrated by outstanding technical milestones developed and manufactured entirely in house such as the bidirectional automatic winding system with a peripheral rotor. This distinctive construction allows for the watch's flat design, while ensuring eminent reliability and an unhindered view of the superior movement. Or the peripherally suspended "floating" tourbillon, a world first.

— In 2018, the Carl F. Bucherer Heritage line was launched as tribute to both our multifaceted tradition of the Swiss watchmaker and Carl F. Bucherer's roots in Lucerne. I invite you to enjoy the journey through our selection of exclusive masterpieces, born out of our rich heritage and savoir-faire in watchmaking.

Sincerely yours,

Sascha Moeri
CEO of Carl F. Bucherer

A small yellow bird is captured in mid-flight, its wings spread wide, showing intricate feather patterns. The bird is positioned on the left side of the frame, facing right. The background is a soft, out-of-focus mix of warm brown and gold tones, suggesting a natural, outdoor setting. The lighting is warm and directional, highlighting the bird's feathers.

FREE SPIRIT

SINCE 1888

Self-confidence is an essential prerequisite for becoming established as an entrepreneur. Carl Friedrich Bucherer's self-confidence was based on creativity, technical skills, prudence and a steadfast adherence to his goals.

— Since it's foundation in 1888, the company formed by this visionary figure has remained in the sole ownership of the Bucherer family.

— Continuity, free spirit and entrepreneurial independence are thus hallmarks of the brand, as is the dynamism that has again and again put it decisively ahead of the times.

SAVOIR-FAIRE

SINCE 1888

Every timepiece that leaves the Carl F. Bucherer workshops is a miracle in miniature. More than 100 components seamlessly intermesh to make a Carl F. Bucherer creation what it essentially is: a masterpiece of the fine art of watchmaking. But something that is true for the watch itself also applies to the company that develops and manufactures it. After all, it is not unusual for a large number of specialists from a wide variety of disciplines to be involved in the creation of a Carl F. Bucherer watch.

— Each of them is driven by the passion of creating something unique: the peripheral rotor, for example, which is found in all the CFB-manufactured calibers. It winds the movement with astonishing efficiency while providing a

view of the fascinating mechanics. Thus, it ideally combines the advantages of conventional systems while eliminating their disadvantages. Or take the patented mechanical time zone display in the Patravi TravelTec, which enables the user to switch between a third readable time zone at the touch of a button. — But for all the passion, inventiveness and technical finesse, there is always an equal focus on the functionality and unique aesthetic appeal of each and every timepiece. — It is for this reason that the designers at Carl F. Bucherer attach importance to the tiniest detail. Their aim is to create timepieces which, from the very beginning, have inspired fascination through master craftsmanship, their unique inner values and their extraordinary sense of style.

THE BIDIRECTIONAL AUTOMATIC WINDING SYSTEM WITH A PERIPHERAL ROTOR
IS A REVOLUTIONARY APPROACH TO WATCHMAKING.

MANUFACTURE CALIBER CFB T3000

OUTSTANDING ACCURACY

The tourbillon is viewed as the crowning achievement of watchmaking. The engineers and watchmakers of Carl F. Bucherer have implemented this fascinating mechanism in a movement like no other. In the new CFB T3000 manufacture caliber, the tourbillon appears to float, but is actually mounted peripherally. A world first developed exclusively by Carl F. Bucherer, the pioneer of the peripheral automatic winding system. Further highlights are the stop-seconds function of the tourbillon and the fact that the movement is a COSC-certified chronometer.

— The benefits of this construction principle inspired the engineers and watchmakers at Carl F. Bucherer to develop a very special kind of tourbillon. Unlike traditional tourbillon features, it is neither mounted in the movement's main plate nor in an overlying bridge. Instead, the shockproof tourbillon cage, which appears to float inside the watch, is actually sitting securely in position and supported peripherally by three ceramic ball bearings. Distinctively non-visible to observers, these bearings ensure precise guidance and smooth running.

MANUFACTURE CALIBER CFB T3000 WITH FLOATING TOURBILLON.

HERITAGE

*The Heritage line is a tribute to both
the multifaceted watchmaking
tradition of Carl F. Bucherer and to
its roots in Lucerne.*

— This range features only limited-
edition timepieces. Combining a
unique design inspired by more than
130 years of “Made of Lucerne”
watchmaking, traditional crafts-
manship, sophisticated complications,
and the finest materials, these
extraordinary timepieces are bound
to stand the test of time.

HERITAGE TOURBILLON

DOUBLE PERIPHERAL

LIMITED EDITION

A Tribute to 130 Years of “Made of Lucerne” Watchmaking Heritage

— The Heritage Tourbillon Double-Peripheral is limited to just 88 timepieces – a homage to the year Carl F. Bucherer was founded, 1888. It’s elaborately finished 18-karat rose gold case reflects the golden luster of the baroque city Lucerne. Another homage to the birthplace of the brand is the movement bridge crafted in 18-karat white gold, with the hand-engraved Chapel Bridge, the result of more than two weeks of meticulous craftsmanship.

— At the heart of the Heritage Tourbillon DoublePeripheral Limited Edition is the in-house, COSC-certified CFB T3000 caliber, featuring a tourbillon with a floating appearance and an automatic winding system that are both mounted peripherally – a world’s first.

— As a special tribute to the rich heritage of the brand and this limited-edition timepiece, the movement’s peripheral rotor is crafted in 22-karat rose gold – a perfect match to the watch case, also made of rose gold.

MANERO

The Manero is virtuoso watch-making craftsmanship in its most authentic form, a timeless classic of discreet yet powerful elegance. Its entire essence is contained in its name, which is derived from the Latin 'manuaria', meaning 'that which is led by the hand'.

— The name Manero points to the precisely adjusted internal life of the watch with its mechanical refinement, the complexity of which is clearly conveyed by the elaborate three-dimensional dials.

— The Manero is conceived for people who appreciate the hidden values of the mechanical movement as much as the straight-lined beauty of this timepiece.

MANERO TOURBILLON

DOUBLE PERIPHERAL

MASTERPIECE WITH FLOATING

TOURBILLON

Carl F. Bucherer demonstrates its innovative capacity with the introduction of the Manero Tourbillon DoublePeripheral featuring the COSC-certified CFB T3000 movement. It is a world first, developed entirely in-house combining a peripheral automatic winding system and a peripherally mounted tourbillon that appears to float.

— Such a unique tourbillon deserves the full attention; prominently placed at 12 o'clock, it is a real eye-catcher. The tourbillon cage, which rotates around its own axis once every minute, features a second hand that acts as a seconds display. A further distinctive feature is the stop-seconds function, which allows for the rotation of the tourbillon cage to be stopped.

MANERO POWERRESERVE

GET ALL THE POWER

WHEN YOU CALL FOR IT

Elegant perfection of form embraces sophisticated mechanics. The Manero PowerReserve makes a statement on time and its course.

—A glance at its dial reveals how much power it still has in store. To accomplish this, a special module made in-house is incorporated into the movement to display the power reserve. Thus the caliber CFB A1011 takes its place for the first time in the Manero line, combining external design of traditional inspiration with the most innovative technology within.

MANERO PERIPHERAL

A MASTERFUL COMBINATION

OF THE PUREST MATERIALS

The Manero Peripheral combines all that distinguished Carl F. Bucherer as a true watch manufacturer: state-of-the-art engineering and classic watchmaking expertise. For this reason, it is the perfect setting for the CFB A2000 in-house caliber.

— Specially for the Manero Peripheral, the engineers modified the movement to create the CFB A2050 with a central hour and minute display, small seconds at 6 o'clock and date at 3 o'clock. The CFB-manufactured movement is a certified chronometer housed in a multi-faceted case that combines clean-cut angles with softly rounded contours to create a visual effect that offers both vibrancy and aesthetic appeal. Typical for the Manero family, the elaborate dial features appliquéd wedge like indices and faceted lancet shaped hands.

MANERO FLYBACK

STYLISHLY FAST AND FURIOUS

The Manero Flyback is a classic example of the Manero family, but as a typical Carl F. Bucherer timepiece, it has something distinctly unique to offer watch lovers: the sophisticated CFB 1970 chronograph movement with flyback function.

— It enables the user to record consecutive times with the shortest possible interval between them. The chronograph hands “fly back” to zero, while the movement continues to run in the background, allowing the hands to resume as soon as the reset button is released. And the setting provided by this little masterpiece is likewise compelling: the case, finished either in rose gold or stainless steel, contains a dial with ten applied indices. Featuring two subdials located at 9 and 3 o’clock, as well as a date display at 6 o’clock. Together with a flange and tachymeter scale running round the dial, these two features give the Manero Flyback its vibrant and singular appearance.

MANERO AUTODATE

STARRING IN JOHN WICK 3

1960s design succeeded in establishing influential trends, creating forms that will last forever. Simple and classically appealing three-hand watches with dials reduced to the essentials set new standards during this period, which have continued to be of major importance in the design of timepieces right up to the present day.

—A striking example of the design features originating from this period can be found in the Manero AutoDate. The three-hand model with date display draws the beholder's attention to what really matters in the stainless steel case with a diameter of 38 millimeters, and the watch is always ready for action thanks to its reliable automatic caliber. What is more, the 42-hour power reserve means that superstar Keanu Reeves aka John Wick could take it off for a while without any problems – not that he has that much time to rest ...

PATRAVI

Traditional watchmaking artistry, the highest technical and innovative standards, striking design – all combined in one watch: the Patravi from Carl F. Bucherer. The sophisticated and carefully decorated mechanical movements are fitted with useful additional functions such as a chronograph, big date and power reserve indicator. In most models, a caseback with sapphire crystal provides a clear view of the fascinating microcosm.

— The case is a harmonious whole, yet extraordinarily complex. Its integrated structure permits a special high-quality surface finish with a subtle interplay of satin and polished components.

— The dials are unequalled in terms of their complexity, richness of detail and readability.

— The interplay with three-dimensionality is unique. The index markers, cut with diamond tools and typical of the Patravi range, are applied by hand.

PATRAVI TRAVELTEC II

DISSOLVING

THE TIME ZONES

Characteristic aplomb, outstanding technology and distinctive self-assurance are unmistakable features of timepieces from Carl F. Bucherer. And the Patravi TravelTec II is impressive proof. The latest addition to the TravelTec line not only has the fascinating ability to display three time zones simultaneously, it also has the appeal of an exciting and elegant combination of black DLC-coated titanium with precious rose gold.

— The massive 47.4 millimeter case speaks for itself – and for the wearer's self-confidence. Like the caseback, the time zone controls and chronograph push buttons are also made of titanium. The intricacies of the Patravi TravelTec II movement highlight a chronometer certified CFB 1901.1 caliber with chronograph functions, while the sophisticated mono-pusher switch mechanics can be admired through a window on the side of the case.

PATRAVI TRAVELTEC BLACK

READY FOR TAKE-OFF

Matte-black and powerful with an air of mystery, the Patravi TravelTec Black is more than a mere timepiece. It not only displays three time zones simultaneously: wearing it is also a statement of clarity, vitality and self-assurance. With an anti-reflective, scratch-resistant and shock-proof DLC finish, the Patravi TravelTec Black does not set out to dazzle. Nevertheless, it shines with its high-level functionality, independent character and many advanced technical features.

— The heart beating away in the steel case speaks an equally forceful and unmistakable language. And the chronometer certified, CFB 1901.1 caliber stands for unmatched precision and reliability. The stark contrast between the dial, hands, indices and scales guarantees high legibility even when visibility is poor and makes the Patravi TravelTec Black an ideal companion, whatever its owner turns his hand to and wherever life takes them.

PATRAVI SCUBATEC BLACK MANTA

SPECIAL EDITION

TIME FOR SUSTAINABLE VALUES

Carl F. Bucherer is supporting since many years the Manta Trust, a UK-based charity, with the mission of conserving the oceans and the habitat of the rare manta rays. The Manta Trust is involved in more than 20 countries for the survival of this threatened species, in particular through various research projects and tireless educational work.

—The latest special edition to join the Patravi ScubaTec family is an ode to a very special ocean dweller: the black manta ray. The Patravi ScubaTec Black Manta is a diver's watch par excellence. The lightweight titanium case boasts a black DLC coating. The deep black hue forms a contrast with the bronze-colored elements recalling old diving equipment. Super-LumiNova adorns the indices and hands, which frame the silhouettes of two manta rays in the center of the black dial. Developed especially for Carl F. Bucherer, its innovative textile strap is mostly composed of recycled PET bottles. Consistent with the values of Carl F. Bucherer, part of the proceeds will be donated to the Manta Trust charity.

PATRAVI SCUBATEC MANTA TRUST

LIMITED EDITION

TIME TO SAVE THE MANTAS

With their abundant aquatic flora and fauna, the oceans have been fascinating mankind from time immemorial. Aware of this unique world of grace and fragile unlimited value, Carl F. Bucherer has created a limited edition of 188 pieces in its honor, allowing its owner to participate in the brand's conservation efforts.

— To help protect the threatened manta ray, Carl F. Bucherer agreed on a long-term partnership with the Manta Trust charitable organization. Every watch depicts two mantas on the fine horizontally striped dial and features a unique case-back engraved with a specific living manta and its associated number. Every owner of a Patravi ScubaTec Manta Trust serves as a dynamic ambassador of the unique manta ray that is represented on the case-back. In parallel, Carl F. Bucherer will continue to donate to the Manta Trust, supporting its core operations.

ADAMAVI

As an independent watchmaker, Carl F. Bucherer utilizes its comprehensive experiences in the field of mechanical watchmaking and the art of jewelry to provide timeless continuity. Although Carl F. Bucherer stands for dynamic innovative strength and mechanical innovation, it is equally important to the brand to build upon its competence.

— The concept of perpetuating the tried and tested values of the past is expressed in the Adamavi watch family.

— All models in this range are characterized by pure timeless elegance and mechanical reliability, making them more than just time-pieces. As true companions whose appearance will outlast the short-lived trends of the present they provide the wearer with reliability and continuity.

PATHOS

The Pathos is radiant in a garland of faceted material that reflects the light in atmospheric glints and gleams.

— This exceptional timepiece, a masterly blend of the watchmaker's craft and the jeweler's art, exudes sublime passion.

— Streamlined motifs ornamenting the dial and the case, worked in loving detail, create its flamboyant splendor.

— With its unique design, a Pathos on the wrist impresses by its dignified elegance and individuality and makes every woman shine.

PATHOS SWAN

LIMITED EDITION

THE UNBEARABLE

LIGHTNESS OF BEING

A total of 922 hand-set, finest-quality Top Wesselton diamonds, precious sapphires in various colors, and exquisite rose and white gold: the Pathos Swan is a classic example of Carl F. Bucherer's expertise.

— Not only is this watch a mix of choice materials, it also embodies watchmaking skill and the art of the jeweler at the highest levels. The name Swan is, therefore, more than appropriate for this extraordinary timepiece, especially since so many cultures revere the bird as a symbol of purity, grace, and beauty. Every single detail of this masterpiece is lovingly designed, from the slender hour and minute hands to one of the characteristic features of the Pathos, the aureole. Exquisite stones set along its entire length underscore the aesthetic appeal of the case. The Pathos Swan is a highly exclusive timepiece that is available with a case and bracelet in 18 K rose gold, or in a combination of white and rose gold.

PATHOS GRACE

LIMITED EDITION

The Pathos Grace is pure magic. It is a gem of the watchmaker's art that will captivate watch lovers at first sight: a masterpiece whose elegance, rich variety and consummate craftsmanship cannot fail to be a source of fascination. But it is also much more than that: for anyone who examines the Pathos Grace in greater detail will be unable to break its enchanting spell.

— Each of the 910 hand-set diamonds contributes to the opulent yet delicate aesthetic appeal of this exceptional timepiece. Like stars, the precious gemstones transform the flowing white-gold surfaces of the dial and case into a sea of light alive with vibrant, sparkling reflections. They give the Pathos Grace its extraordinary aura: an aura that touches the soul and will cause that element of the divine in any woman to radiate.

PATHOS DESIRE

LIMITED EDITION

With a desirable sense of exclusivity, this timepiece from the Pathos family is a bold embodiment of extravagance and an expression of feminine elegance. Multifaceted, exuding character and passion, the Pathos Desire extends a promise it fulfills in every detail.

— Delicately fashioned petals made of 18 K white gold and set with diamonds decorate the dial. Like the many diamonds on the bracelet, they playfully refract the light and endow the Pathos Desire with an aura of pure radiance. Beautifully fashioned Roman numerals with a touch of perspective set against mother-of-pearl underscore the watch's unique elegance. Available in a limited edition, this masterpiece of the watchmaker's art with 870 diamonds is far more than a mere timepiece: it is an eloquent expression of life at its most luxurious.

PATHOS DIVA

THE STAGE

IS ALL YOURS

The Pathos Diva in pure rose gold radiates effortless glamor and is a tribute to the beauty of all women.

—The 18 K rose gold of the case glows with a warmth and elegance that underscores the watch's delicate design. Another version, enhanced with brilliant diamonds, adds a scintillating highlight to this expression. In the Diva, the characteristic aureole of the Pathos comes in two different versions: either with a wave design or a filigree grid. Exquisitely integrated into the side of the case, it reflects light in myriad radiating facets. Depending on taste, the dial is available in either precious mother-of-pearl or with ornamentation on pure white. The delicate rose gold links of the bracelet perfectly complement the balanced design of the Pathos Diva, making it a vibrant companion by day or night.

ALACRIA

Since the beginning of time, people have been fascinated by the sparkle of jewels and diamonds. By adorning themselves with fine jewels, they express their personality and zest for life, emphasizing beauty in their own special way.

— To create this beauty, the watchmakers and jewelers at Carl F. Bucherer will have devoted innumerable hours and all their technical knowledge in a process that begins with selecting the precious raw materials, chosen on the basis of the color, purity and cut of the diamonds. Only the best jewels are used. The latest processing technology and a great deal of skill and care are coupled with a real appreciation for manually set gems.

— Each stage in the process requires time; every single movement is checked by an expert. Experienced polishers give the watches their final touch and their definitive sparkle – a sparkle that appears not only in our jewelry watches, but also in the eyes of the women who wear them.

ALACRIA ROYALROSE

LIMITED EDITION

ENJOY A ROSE

THAT WILL NEVER WITHER

The queen of flowers radiates beauty, elegance and brilliance.

— Her loveliness united with strength makes the rose the fragrant enchantress that, for thousands of years, has inspired poets, artists and lovers in equal measure. Now her aristocratic allure and magical power adorn the radiant dial of the Alacria RoyalRose – a tribute to feminine grace.
